DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-17 are rejected under 35 U.S.C. 102(b) as being anticipated by Murayama et al. (Murayama) (US 5,879,841).

With regard to claims 1-17, all of the claimed limitations are either explicitly or inherently taught by Murayama. Which is evidenced by the fact that the current application teaches a method of extending a print area beyond the lower margin and Murayama discloses a method and an apparatus for preparing image area. The expanded area generating means 126 creates a expanded area. The expanded area represents an area of each unit image which is to be printed on the surface of the page. The expanded area generating means expands the periphery of the printing area by the desired size (col 5, lines 21-51).

Response to Arguments

3. Applicant's arguments with respect to claims 1-17 have been considered but are moot in view of the new ground(s) of rejection.
